27th ANNUAL RAM SALE

DERRYNOCK POLL DORSET & MATERNAL STUD's

Flock No. 1143 Founded 1965

Thursday, **9th October**, 2025 at 1.00 pm

Inspection welcome from 10.00am, (BBQ luncheon provided)

Sale offering... 24 ewes

10 - pens of two, 2024 drop, to be sold individually on AuctionPlus only at 12pm.

...147 Poll Dorset rams

31 select single pens

58 pens of two

...80 Maternal rams

40 - pens of two

Vendor...

Ted Beattie

East Trentham, Vic 3458

Phone: (03) 54 241 495 or 0409 189 116

Agent... Elders – Kyneton VIC

- 5% rebate to outside agents in attendance, settling on behalf of clients.

NOTE: - **auction plus** will be available for **all** sale lots (including video)

- phone bidding available (please inquire).

DERRYNOCK IS:

MONITORED NEGATIVE Three Vacc FOR OVINE JOHNES

BRUCELLOSIS ACCREDITED FREE

LAMBPLAN PERFORMANCE RECORDED

FOOTROT FREE

PLEASE BRING CATALOGUE TO SALE

*** *Commercial Focus – Commercial Results* ***

FLOCK HISTORY

Derrynock is located at East Trentham, 20 kms South of Kyneton. The stud was founded in 1965 on Yenong and Yaralla bloodlines with the aim of breeding sound rams exhibiting the attributes of loin-length and muscling, so important for the commercial industry.

In later years selection has incorporated the use of LAMBPLAN figures. For this reason, Thurlstone 295-94 and the 'Doctor', Greyhome 42-95 (AI) were used. Both rams were structurally correct with clean faces and excellent figures. Sons of these rams, including D22, and D42 formed an integral part of the breeding program. The addition of Kurralea 5 Star gave a new element to our breeding with the ultimate combination of elite performance figures and impeccable type and structural soundness.

For the benefit of our stud and our clients we have retained our MN3 (Monitored Negative Three) Johnes status, and have vaccinated again. Therefore, to ensure we remain Johnes Free and retain our status (MN3v), we will not be selling rams at any other sales in 2025.

Derrynock continues to focus its breeding decisions on the economically important traits of prime lamb production. We are striving to breed length in the loin and maximise muscling in the hindquarter, while increasing growth rates, and maintaining leanness. We hope these will be the successful ingredients for high yielding lambs, hence, maximising productivity and profits in the modern prime lamb industry.

LAMBPLAN

- understanding genetic improvement

Top 1%	Animals ranks in the top 1% for that trait.
Top 5%	Animals ranks in the top 5% for that trait.
Top 10%	Animals ranks in the top 10% for that trait.
Top 20%	Animals ranks in the top 20% for that trait.

Birth Weight (bwt) – describes the genetic merit for weight at birth a + ASBV means the progeny will be genetically heavier at birth.

Growth (wwt) – weaning weight 100 days (pwwt) – post weaning 200 days
– describes the genetic merit for growth rate. a + ASBV means the animal is genetically faster growing

Fat (pfat) – describes the value of genes for fat depth, at constant weight a – ASBV means a genetically leaner animal

Muscle (pemd) – describes the value of genes for eye muscle depth a + ASBV means genetically more meat i.e. (potentially better yield)

Faecal Egg Count (fec) – describes the value of genes for worm egg count, a – ASBV means an animal has a higher genetic resistance to worms. Terminal av -24 eggs

Gestation Length (GL) – describes the value of genes for gestation length a – ASBV means the gestation of a ram's progeny will be shorter. Terminal av -0.26 days

Also provided are LAMBPLAN Index values: this combines the ASBV's for growth, fat and eye muscle into a single measure of genetic merit. The Index's used in this catalogue are **TCP**:

- this index describes the value of the ram's genetics at 6 months of age (p=post weaning), and aims to improve Lean Meat Yield (LMY), while maintaining eating quality. Terminal av – 143.6

- TCP now included lambing ease. Please refer to Terminal Index updates in the back of the catalogue.

The LAMBPLAN national terminal sire average, our ASBV's and % ranks, have been drawn from the September 1st LAMBPLAN data.

∞/sv = Symbol identifies rams that have been genomics tested & sire verified.

∞/p = Symbol identifies rams that have been genomics tested & results pending.

DESCRIPTION OF SIRES USED

Ivadene 31/22

bwt	wwt	pwwt	pfat	pemd	TCP
0.73	16.1	22.5	-0.7	2.3	158.4

An outcross sire, who has performed extremely well. His progeny have elite performance and good structure.

Aberdeen 448/22

bwt	wwt	pwwt	pfat	pemd	TCP
0.60	12.6	19.2	-0.2	3.1	162.3

A unique sire with amazing growth and a great carcass. Elite early maturity.

Derrynock 405/20

bwt	wwt	pwwt	pfat	pemd	TCP
0.03	11.1	17.0	0.6	4.2	154.0

Our best son of D 400. His sons are super clean, with lower birth weight and shorter GL and are ideally suited to the trade market. He is breeding with great consistency!!

Derrynock 53/20

bwt	wwt	pwwt	pfat	pemd	TCP
0.49	11.0	16.3	0.2	2.7	154.3

A standout son of L 625. His sons are very correct with great carcass shape. Trait leading genes for IMF.

Derrynock 110/22

bwt	wwt	pwwt	pfat	pemd	TCP
0.53	13.5	20.3	0.1	2.5	149.1

One of the highest weaning growth rams we have bred and used. Great length.

Derrynock 145/21

bwt	wwt	pwwt	pfat	pemd	TCP
-0.11	9.2	14.8	0.1	2.6	148.1

A sire that has really performed well. His sons stood out as lambs. He is a trait leader for IMF.

Note: The birth type of the rams is represented in the ID as:

(t) – twin (tr) – triplet (q) – quad

DESCRIPTION OF SIRES USED

Valma 144/19

bwt	wwt	pwwt	pfat	pemd	TCP
0.07	10.3	15.3	-0.5	3.6	151.5

A great all-round performer. With low birth weight, and a trait leader for GL, his sons are ideally suited to ewe lamb joining's.

Derrynock 28/17

bwt	wwt	pwwt	pfat	pemd	TCP
0.37	10.4	15.5	-1.0	2.1	156.1

A good old performer, with excellent growth and eating quality genes.

Derrynock 78/21

bwt	wwt	pwwt	pfat	pemd	TCP
0.57	10.0	16.0	-0.3	3.1	160.7

Another son of L 625. His sons are very correct with great carcass shape, and good dense skin. Trait leading genes for IMF.

Lambpro 1818/18

bwt	wwt	pwwt	pfat	pemd	TCP
0.46	9.0	11.6	0.6	4.3	152.9

A moderately framed ram, with good early maturity. Top 5% IMF, top 10% for SF.
A great outcross ram for elite Eating Quality.

Special Note:

**** Semen Share Retained****

Derrynock retains the right to collect semen, in any of the rams offered at auction. The semen is to be collected at Derrynock's expense, and at the convenience of the purchaser.

National Terminal Sire Average **9.8 15.2 -0.2 +2.2 143.6**

DESCRIPTION OF Maternal SIREs USED

Cashmore 3752/22

- Elite fertility and muscle, with a very low adult weight and early maturity.

Cashmore 2817/22

- This sire was used specifically to improve early growth. Good type

Cashmore 3253/21

- Another proven performer with great all-round performance. Progeny have high maternal fat and elite muscling.

Cashmore 2163/20

- This sire has been used specifically for his good skin and excellent bare breech and points.

Cloven Hills 1527/19

- This ram has elite early growth and muscling. He has bred excellent type, with great length and short gestation length.

Derrynock 621/23

- One of the top priced rams in last years sale. Good all round performer with strong type.

Derrynock 1158/22

- This ram has bred progeny with great strength and bone

∞ = Symbol identifies rams that have been genomics tested

Margaret House Refuge (MHR) provides emergency and temporary accommodation properties for victims of domestic violence, or those who find themselves homeless due to crisis.

MHR is utilised by the Young Crisis Accommodation Centre (YCAC), who support and case manage women, men, youth and families in need, servicing the Young, Harden, Boorowa, Cootamundra and Temora regions.

We are incredibly proud of what MHR has achieved over the past decade in supporting our community. The MHR accommodation continues to be fully occupied, with the need for more accommodation growing. YCAC supported 392 individuals in the 2022/23 financial year, up from 273 in 2020/21. Unfortunately, YCAC cannot place all of their clients into emergency or temporary accommodation simply because there is not enough available in the region.

In order to expand on our accommodation options available for people in crisis, MHR purchased an additional residential property in late 2022. We are looking to substantially increase the number of residential options on that site, whilst maintaining the current properties.

Any donations that you would like to make to MHR is gratefully received. We are a voluntary committee and every dollar raised goes towards maintaining and finding more accommodation options. We are always humbled by the generosity of the community and thank you for your support.

Contact Anna Hayes on 0476 786 844 if you have any questions or would like to make a direct donation to MHR. Or head to our website <https://www.margarethouserefuge.org.au/support-us>

Thank you!!
