- phone bidding available (please inquire).

DERRYNOCK IS:
MONITORED NEGATIVE Three Vacc FOR OVINE JOHNES
BRUCELLOSIS ACCREDITED FREE
LAMBPLAN PERFORMANCE RECORDED
FOOTROT FREE

(Covid-19 restrictions & guidelines at the time of sale will be followed)

PLEASE BRING CATALOGUE TO SALE

** Commercial Focus – Commercial Results **

FLOCK HISTORY

Derrynock is located at East Trentham, 20 kms South of Kyneton. The stud was founded in 1965 on Yenong and Yaralla bloodlines with the aim of breeding sound rams exhibiting the attributes of loin-length and muscling, so important for the commercial industry.

In later years selection has incorporated the use of LAMBPLAN figures. For this reason, Thurlstone 295-94 and the 'Doctor', Greyhome 42-95 (AI) were used. Both rams were structurally correct with clean faces and excellent figures. Sons of these rams, including D22, and D42 formed an integral part of the breeding program. The addition of Kurralea 5 Star gave a new element to our breeding with the ultimate combination of elite performance figures and impeccable type and structural soundness.

For the benefit of our stud and our clients we have retained our MN3 (Monitored Negative Three) Johnes status, and have vaccinated again. Therefore, to ensure we remain Johnes Free and retain our status (MN3v), we will not be selling rams at any other sales in 2021.

Derrynock continues to focus its breeding decisions on the economically important traits of prime lamb production. We are striving to breed length in the loin and maximise muscling in the hindquarter, while increasing growth rates, and maintaining leanness. We hope these will be the successful ingredients for high yielding lambs, hence, maximising productivity and profits in the modern prime lamb industry.

LAMBPLAN

- understanding genetic improvement

Top 1%	Animals ranks in the top 1% of all terminal sires for that trait.
Top 5%	Animals ranks in the top 5% of all terminal sires for that trait.
Top 10%	Animals ranks in the top 10% of all terminal sires for that trait.
Top 20%	Animals ranks in the top 20% of all terminal sires for that trait.

Birth Weight (bwt) – describes the genetic merit for weight at birth a + ASBV means the progeny will be genetically heavier at birth.

Growth (wwt) – weaning weight 100 days (pwwt) – post weaning 200 days
– describes the genetic merit for growth rate. a + ASBV means the animal is genetically faster growing

Fat (pfat) – describes the value of genes for fat depth, at constant weight a – ASBV means a genetically leaner animal

Muscle (pemd) – describes the value of genes for eye muscle depth a + ASBV means genetically more meat i.e. (potentially better yield)

Faecal Egg Count (fec) – describes the value of genes for worm egg count, a – ASBV means an animal has a higher genetic resistance to worms. **Terminal av -25 eggs**

Gestation Length (GL) – describes the value of genes for gestation length a – ASBV means the gestation of a ram's progeny will be shorter. **Terminal av -0.15 days**

Also provided are LAMBPLAN Index values: this combines the ASBV's for growth, fat and eye muscle into a single measure of genetic merit. The Index's used in this catalogue are **TCP:**

- this index describes the value of the ram's genetics at 6 months of age (p=post weaning), and aims to improve Lean Meat Yield (LMY), while maintaining eating quality. **Terminal av – 150.4**

Trade\$ - indicates an animal's suitability to the trade market, in real dollar terms. **Terminal av – 110.7**

The LAMBPLAN national terminal sire average, our ASBV's and % ranks, have been drawn from the March 15th & August 15th LAMBPLAN data.

DESCRIPTION OF (AI) SIRES USED

Aberdeen 679/16

bwt	wwt	pwwt	pfat	pemd	C+
0.14	9.8	14.8	0.4	4.0	220

An outcross sire, who has performed extremely well. His progeny are very clean, with excellent depth and width. He is a trait leader for muscling and TCP.

Old Woombi 425/18

bwt	wwt	pwwt	pfat	pemd	TCP
0.13	11.4	18.2	-0.3	3.4	162.7

A unique sire combining low birth weight, and extreme early growth. His progeny are moderately framed with elite early maturity.

Bundara Downs 180/17

bwt	wwt	pwwt	pfat	pemd	TCP
0.71	13.1	20.5	-1.3	3.7	165.3

This ram was selected for his super clean points and correctness. He has bred very well, with very early maturity and very short GL.

Linton 625/16

bwt	wwt	pwwt	pfat	pemd	TCP
0.52	12.1	18.5	0.0	2.9	165.7

This ram was selected for his super clean points, smooth shoulders, correctness and Eating Quality. He has bred very well, with excellent muscling and length. He is a trait leader for Shear Force, and in particular IMF.

Felix 494/16

bwt	wwt	pwwt	pfat	pemd	TCP
0.57	10.8	19.2	0.2	3.9	164.2

A very smooth and correct son of BD 3266. His progeny are early maturing, with excellent wool. He is a trait leader for Eating Quality.

Jewsharp 14/15

bwt	wwt	pwwt	pfat	pemd	TCP
0.18	10.4	16.0	-0.3	4.8	157.1

A unique sire combining low birth weight, good early growth and extreme muscling.

Note: The birth type of the rams is represented in the ID as:

(t) – twin (tr) – triplet (q) – quad

DESCRIPTION OF SIRES USED

Derrynock 3/18

bwt	wwt	pwwt	pfat	pemd	TCP
0.56	12.0	18.2	-0.7	2.7	151.9

A very correct son of A 679, with extreme growth and excellent structural soundness. He has very dense wool. Was a standout of his drop before injury, elite for GL.

Derrynock 12/18

bwt	wwt	pwwt	pfat	pemd	TCP
0.35	10.5	15.8	0.2	4.8	154.6

A great all-round performer. With a moderate birth weight, and a trait leader for GL, his sons are ideally suited to all ewe classes. Highest muscle ram ever produced at Derrynock.

Derrynock 33/18

bwt	wwt	pwwt	pfat	pemd	TCP
0.95	11.3	16.5	-1.3	3.0	156.7

Top priced ram in his drop, with a freak carcass, combining length and depth. His sons are powerful and correct.

Derrynock 156/19

bwt	wwt	pwwt	pfat	pemd	TCP
0.57	12.3	18.8	-0.8	2.5	160.5

A stylish son of Old Woombi 135/12. He is a trait leader for growth, and eating quality which makes him a curve bending sire.

Derrynock 400/19

bwt	wwt	pwwt	pfat	pemd	TCP
0.23	11.0	17.0	0.0	4.8	158.9

Our top selling son of D 12. His sons are super clean, with lower birth weight and shorter GL and are ideally suited to the trade market.

Derrynock 820/19

bwt	wwt	pwwt	pfat	pemd	C+
0.30	11.3	17.7	0.4	3.5	149.4

A very correct and stylish son of OW 42. His progeny exhibit his all-round balance and correctness, with lower birth weight and elite gL.

Special Note:

*** Semen Share Retained***

Derrynock retains the right to collect semen, in any of the rams offered at auction. The semen is to be collected at Derrynock's expense, and at the convenience of the purchaser.
